### **DETAILED ACTION**

Note that this second restriction requirement is necessary for examination to take place. The office regrets that the first restriction requirement was not done under 371 rules, under which this restriction requirement is done.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to an ultrasound detection/emission apparatus.

Group II, claim(s) 16-24, drawn to a method of making an ultrasonic transducer.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the process as claimed can be used to make another and materially different product such as a piezoelectric polymer film actuator for an ink jet printer, an electrostatic motor or sensor component, a frequency detection/compensation device, etc. Additionally, the inventions have acquired a separate status in the art and have different classifications.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Direct inquiry concerning this action to Examiner Dougherty at (703) 308-1628.
